Chancellor's Educational Research Grant Competition Deadline May 3, 2010

To support the Mission of the University and the Health Professions Division (HPD), Chancellor Fred Lippman, with the support of the Center for Teaching and Learning, announces its **2010 Educational Research Grant** competition. The competition seeks to stimulate research on health professions education issues and supports research projects that are either quantitative or qualitative in nature. Research grants are available for faculty. Applications are encouraged from all Health Professions disciplines.

Applicants are encouraged to submit proposals that:

- develop or benefit from new quantitative or qualitative measures or methodological approaches for addressing education issues.
- include interdisciplinary teams with subject matter expertise.
- examine policies and practices related to student achievement.
- explore contextual factors in education.
- focus on educational participation and persistence.

Eligibility

Applicants must have received their professional degree by the start date of the grant. Please note that investigators who have previously received an award through the HPD Research Grants Program or the Presidential Scholarship Program may still apply for the Educational Research Grant. Doctoral dissertations or Masters' theses are not eligible.

Awards

Two awards of \$10,000 each are offered. Projects must be 1-2 years in duration. At the end of the project, grant recipients will be asked to give a presentation to HPD faculty on their research findings and outcomes, such as presentations and publications are expected.

Proposal Writing

Proposals must be self-contained within the specified page limitations. Internet Web site addresses (URLs) may not be used to provide information necessary to the review. The proposal form is available at <http://www.nova.edu/cwis/hpdtesting/ctl/>

Administration

Proposals must be submitted to the Secretary for HPD Research—Ms. Chi Do (Room 1522-A, x21784) no later than May 3, 2010. Grants may be used for any purpose other than the investigators' salaries. Up to \$1,400.00 for travel expenses may be budgeted. Please note that the award may not be used to offer cash payment to study subjects; however, non-monetary inducements are eligible (i.e., gift cards). Successful grant applicants will be notified by May 15, 2010.

The Office of Research in the Health Professions Division provides support for the faculty and staff of the Health Professions Division in their efforts to obtain and conduct research, while ensuring compliance with NSU policy, sponsor policy, and applicable law.
